Yerrithatha Choppa

Data specialist | Python, SQL, Pandas | I Transform Complex Financial Data Into Trusted Insights at S&P Global
Hyderabad, Telangana, India

Summary

I'm Yerrithatha Choppa, currently working as a Lead Data Analyst at S&P Global, and I love transforming complex financial data into meaningful insights that drive business decisions.

One interesting fact about my career is, I combined my MBA in Finance with Python programming skills to become a unique blend of a Finance Professional who codes

My domain expertise in Fundamental Analysis and Financial Research helps me understand the "why" behind the numbers, enabling me to build smarter data validation scripts and uncover hidden patterns in financial statements.

Tools and Technologies I work with:

Python (PCAP & PCEP Certified)

SQL

Pandas & NumPy

Matplotlib & Scikit-Learn

Data Validation & Error Handling

My Functional Areas:

Financial Data Analysis

Fundamental Analysis

Data Validation & Quality Assurance

Root Cause Analysis

Financial Reporting & Research

I strongly believe in continuous learning and staying updated with the latest in Data Science and AI. Currently exploring advanced topics in Statistics for AI and Machine Learning

To connect, collaborate, or discuss data-driven insights in finance, feel free to reach out here

Experience

S&P Global

11 years 6 months

Data Specialist

July 2026 - Present (1 month)

Hyderabad

- Developed and Maintained Financial Data Validation Scripts: Created and maintained Python scripts to validate and analyze financial data, ensuring compliance with financial reporting standards.
- Utilized data parsing techniques to convert JSON data into Pandas DataFrames for efficient data manipulation and analysis.
- Implemented error handling mechanisms using try-except blocks to manage exceptions and ensure smooth execution of data processing tasks.
- Developed custom checks for financial metrics such as Average Shares, Total Liabilities, and Net Income, ensuring data integrity and consistency across reporting periods.
- Enhanced Data Comparison and Reporting: Designed functions to compare current and historical financial data, identifying discrepancies and ensuring accurate financial reporting.
- Employed advanced logic to determine prior fiscal periods for accurate historical comparisons.
- Generated detailed error reports highlighting discrepancies in financial data, including mismatched values and missing mappings.
- Automated Financial Data Checks: Automated the process of checking for misspelled words in financial reports and ensuring that key financial metrics are consistently reported.
- Integrated spell check functionality to identify and correct misspelled words in financial data entries.
- Developed logic to ensure that shares to be repurchased under Repurchase Plans are not less than those in earlier periods within the same fiscal year.
- Collaborated with Cross-Functional Teams: Worked closely with financial analysts and data scientists to understand business requirements and translate them into technical solutions.
- Provided technical support and guidance to team members on Python programming and data analysis techniques.

Key Technologies: Python, Pandas, JSON, Data Analysis, Financial Reporting, Error Handling, Data Validation

Skills: Python (Programming Language), pandas, +4 skills

Lead Data Analyst
