PROFESSIONAL SUMMARY:

Lead Data Analyst specializing in financial statement data validation and analysis, leveraging Python and SQL to support accurate and reliable financial reporting. Acting as technical POC for developers by guiding implementation standards, reviewing logic, resolving technical blockers, with strong Foundations in statistics and machine learning concepts and continuous upskilling in Generative AI.

CORE SKILLS:

- Languages: Python, SQL, PostgreSQL
- Domain Knowledge: Statistics and Math for Data Science
- Machine Learning Concepts: Regression, Classification, Supervised/Unsupervised Learning, Simple & Multiple Regression Techniques.
- Generative AI Tools: GitHub Copilot, Cursor, Windsurf, Claude.
- Platforms: PyCharm, Jupyter notebook, Visual Studio Code
- Version Control: Git, GitHub
- API Development: Fast API (Custom API Development), Postman (API Testing)
- Soft skills: good communication, Strong analytical and data-gathering skills
- Tools: Power BI, Azure Cloud, Advanced Excel.

PROFESSIONAL EXPERIENCE:

S&P Global – Data Specialist (July 2026 - Present)

- Developed and Maintained Financial Data Validation Scripts: Created and maintained Python scripts to validate and analyze financial data, ensuring compliance with financial reporting standards.
- Acted as primary technical point of contact (POC) for python initiatives, guiding developers on implementation standards, review logic, resolving technical blockers, and ensuring alignment with business requirement.
- Utilized data parsing techniques to convert JSON data into Pandas DataFrames for efficient data manipulation and analysis.
- Implemented error handling mechanisms using try-except blocks to manage exceptions and ensure smooth execution of data processing tasks.
- Developed custom checks for financial metrics such as Average Shares, Total Liabilities, and Net Income, ensuring data integrity and consistency across reporting periods.
- Enhanced Data Comparison and Reporting: Designed functions to compare current and historical financial data, identifying discrepancies and ensuring accurate financial reporting.
- Employed advanced logic to determine prior fiscal periods for accurate historical comparisons.
- Generated detailed error reports highlighting discrepancies in financial data, including mismatched values and missing mappings.
- Automated Financial Data Checks: Automated the process of checking for misspelled words in financial reports and ensuring that key financial metrics are consistently reported.
- Integrated spell check functionality to identify and correct misspelled words in financial data entries.

Key Technologies: Python, Pandas, JSON, Data Analysis, Financial Reporting, Error Handling, Data Validation.

S&P Global – Lead Data Analyst (Jan 2023 – July 2026)

- Developed and Maintained Financial Data Validation Scripts: Created and maintained Python scripts to validate and analyze financial data, ensuring compliance with financial reporting standards.
- Acted as primary technical point of contact (POC) for python initiatives, guiding developers on implementation standards, review logic, resolving technical blockers, and ensuring alignment with business requirement.
- Utilized data parsing techniques to convert JSON data into Pandas DataFrames for efficient data manipulation and analysis.
